MAKE IT HAPPEN

SPECIALIST SUPPORT PROVISION

**TRAINING
FOR SUCCESS**

Introduction

Participants on the Department's Training for Success and ApprenticeshipsNI programmes who require specialist support will be given every opportunity to address their difficulties using the most appropriate support mechanisms available.

Specialist Support providers are available to work with participants in conjunction with Training Suppliers delivering both programmes. Specialist Support providers have a proven track record in dealing with the personal needs of participants, from those with a disability to those with personal, social and/or learning needs.

Whilst their main target group will be those participating in **Training for Success**, individual support will also be accessible for those undertaking training under **ApprenticeshipsNI** where a support need is identified.

A supplement may be payable in respect of participants with a disability to enable a Training Supplier to provide significant additional resources in terms of training time, equipment or support to assist the participant to fully benefit from the training.

Training Suppliers can also avail of additional funding (up to £1000 annually) for Specialist Support services for participants with a disability or additional need which significantly affects a participant's potential to achieve.

The services offered by Specialist Support providers and the funding available from the Department are outlined in the **Operational Guidelines**.

Specialist Support Providers
